DAWAT-E-HADIYAH | JAMAAT KHADKI, PUNE

Umoor Sehat

Admin Portal

Ashara Ohabat 1448H — Special Medical Camp

Walkthrough Contents:

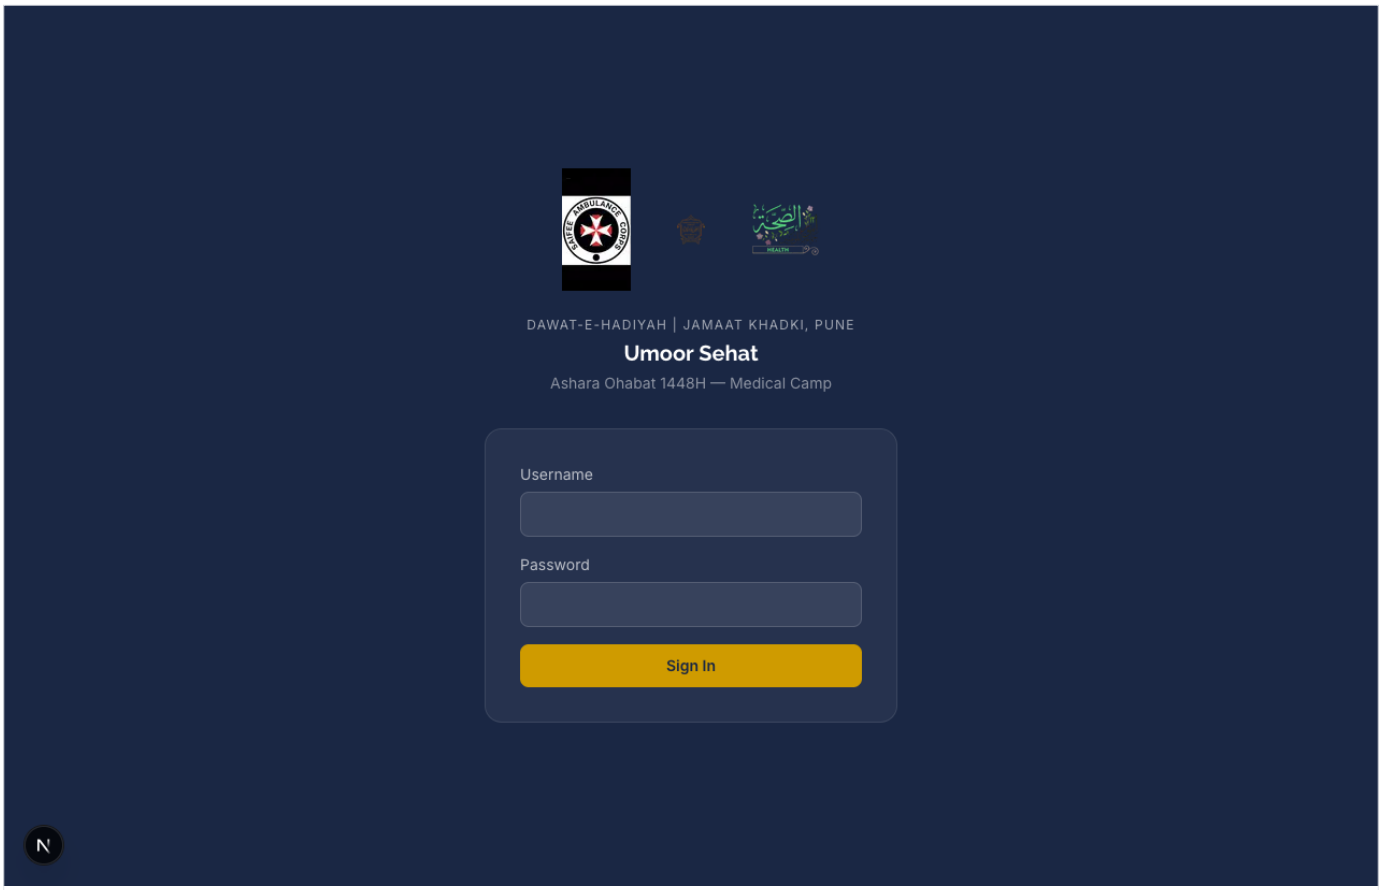
1. Login to the Sehat Admin Portal
2. Dashboard — Live Token Counters
3. Medical Camp — Patient List
4. Add Patient — 2-Step Form
5. Token Assignment (Auto-numbered)
6. Health Screening Card (A4 Letterhead)
7. Save & Print Options
8. Live Queue Board — Mark Patients Done
9. Reset Queue & Token Controls

Step 1 — Login

Open the Umoor Sehat admin portal at /sehat/login. Enter the credentials:

Username: admin
Password: admin

Then click Sign In to access the dashboard.

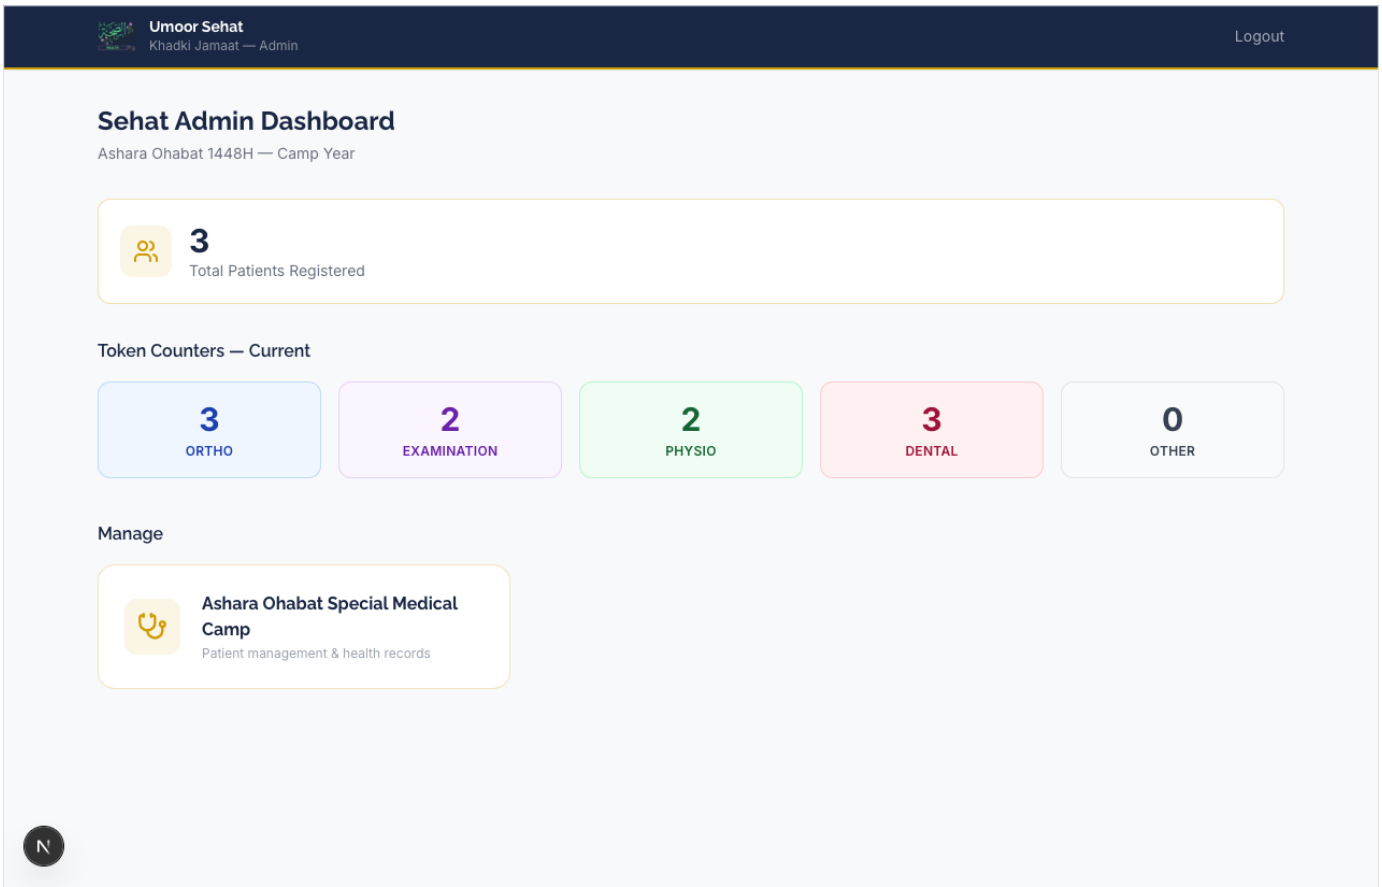


Step 2 — Admin Dashboard

After login the dashboard shows:

- Live token counters for each category (Ortho, Examination, Physio, Dental, Other) — these increment as patients are added.
- Total patients registered for the camp.
- A menu card to open the Ashara Ohabat Special Medical Camp.

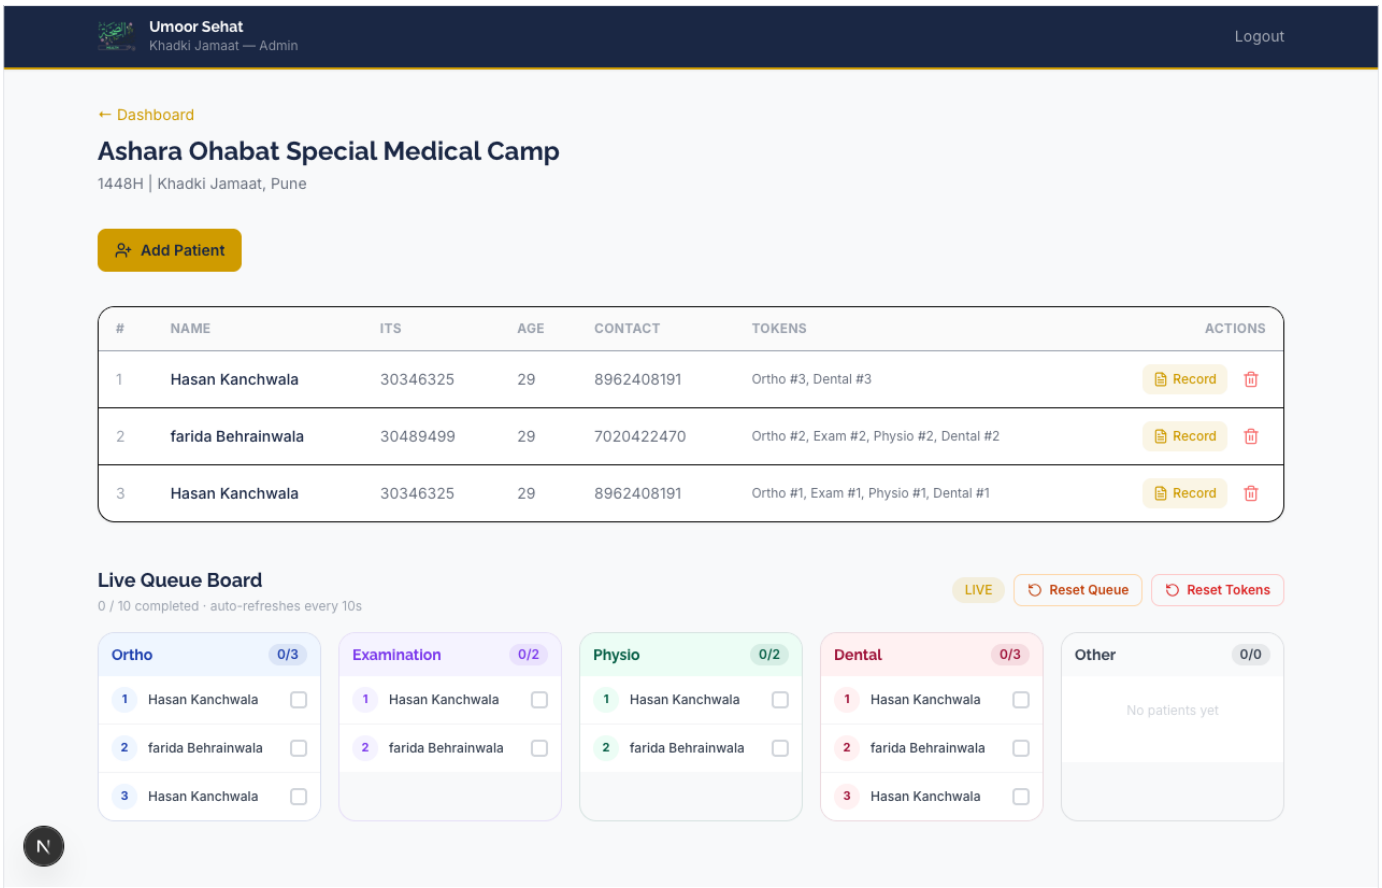
Use the Logout button in the top-right to end the session.



Step 3 — Medical Camp — Patient List

The Medical Camp page lists all registered patients in a table showing:
Name, ITS Number, Age, Contact, and Assigned Tokens.

Click 'Add Patient' to register a new patient. The blue 'Record' button opens their Health Screening Card.

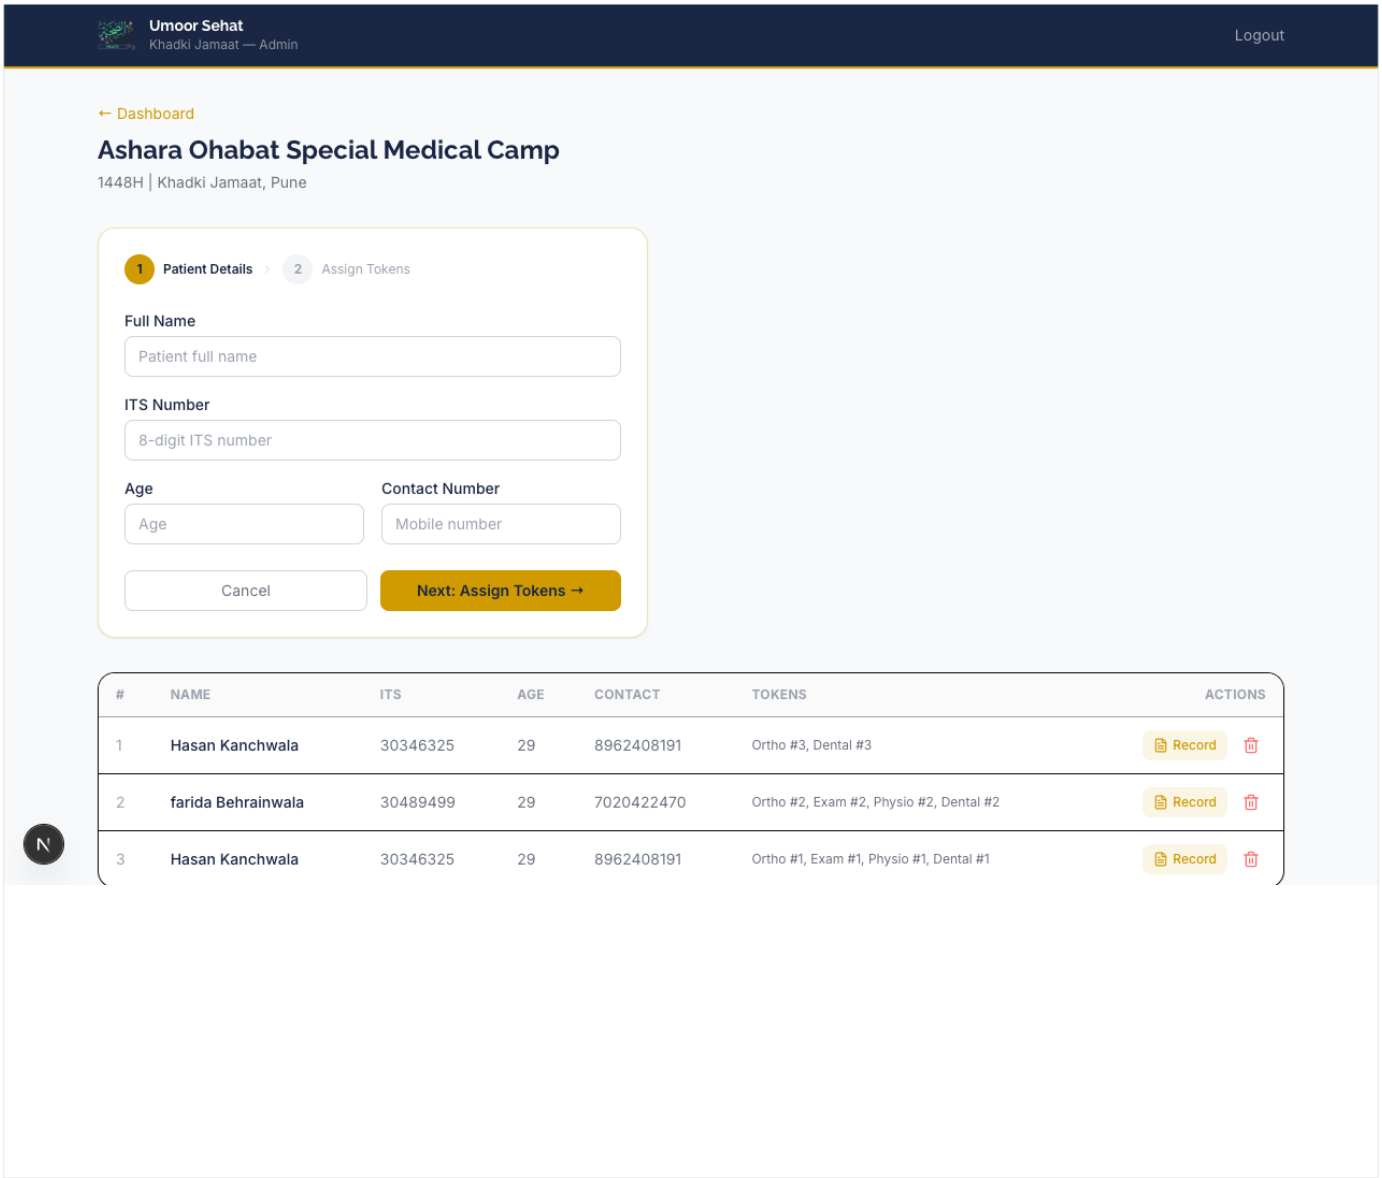


Step 4 — Add Patient (Step 1: Patient Details)

A 2-step form appears.

Step 1 — Enter patient details:
- Full Name
- ITS Number (8-digit)
- Age
- Contact Number

Click 'Next: Assign Tokens !'' to proceed to token assignment.

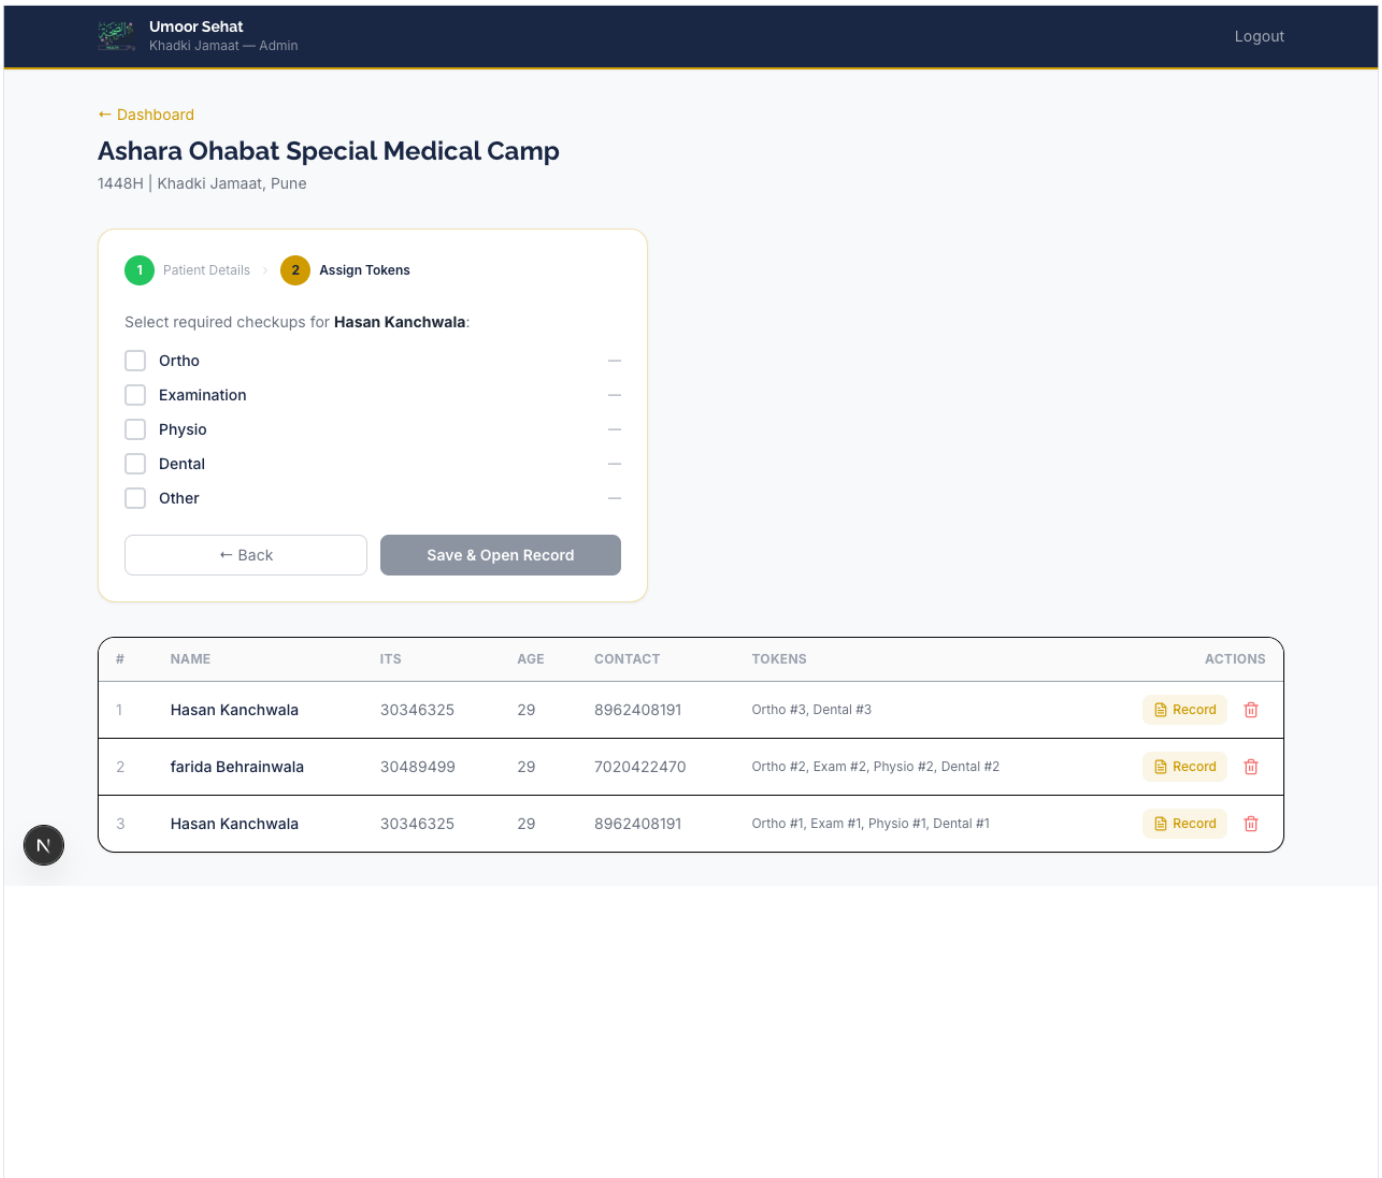


Step 5 — Add Patient (Step 2: Assign Tokens)

Step 2 — Select which checkup categories the patient needs.

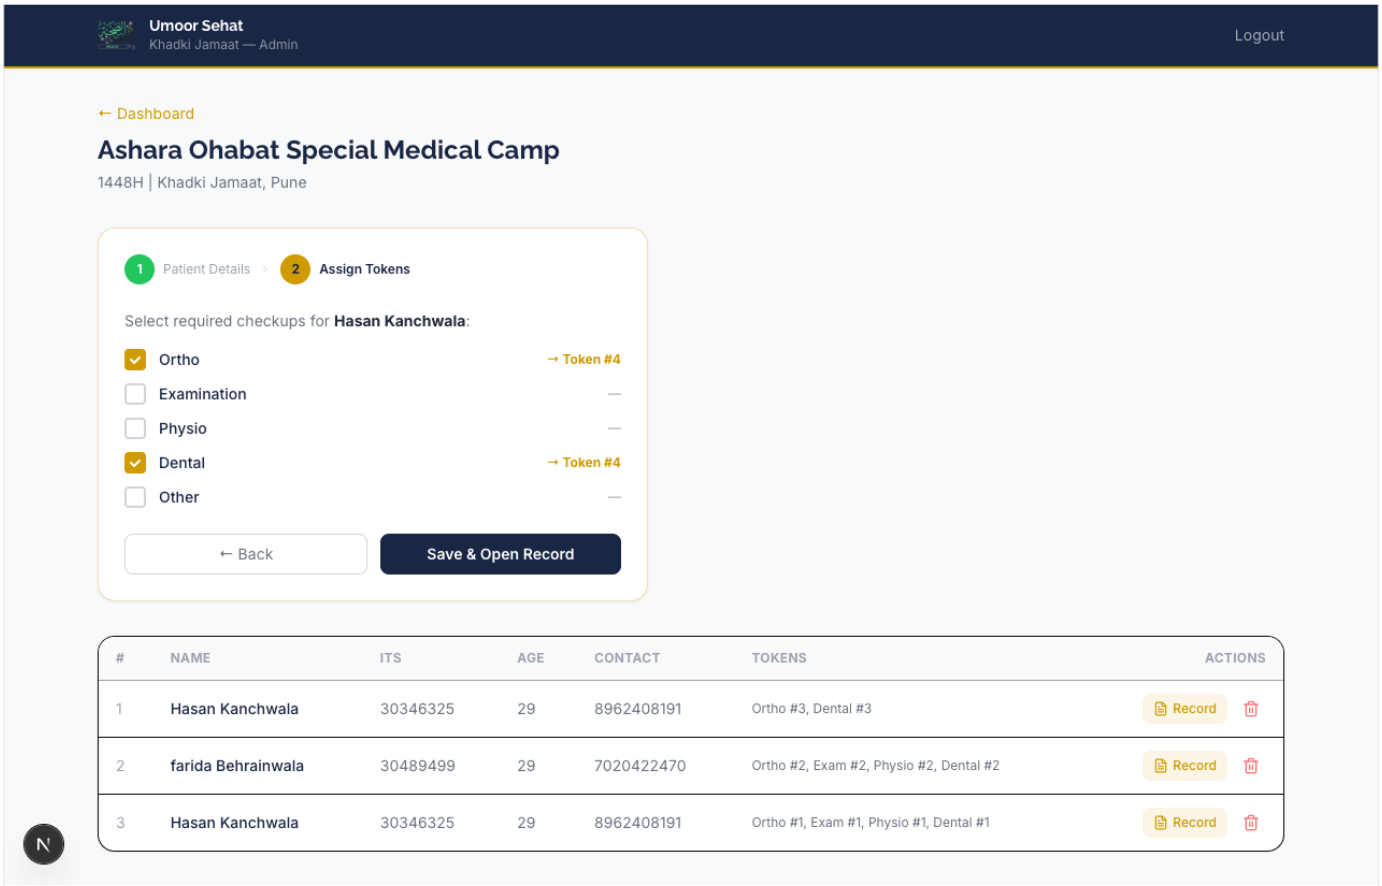
For each selected category, the system previews the next token number that will be assigned (e.g. '!' Token #1'). Token numbers are auto-incremented per category — each category has its own independent counter.

Click 'Save & Open Record' to save and open the patient's Health Screening Card.



Step 5b — Tokens Selected (preview)

With Ortho and Dental selected, the system shows a preview of the token numbers that will be assigned on save. The token numbers shown are live — if another patient was already added to that category, the next available number is shown.



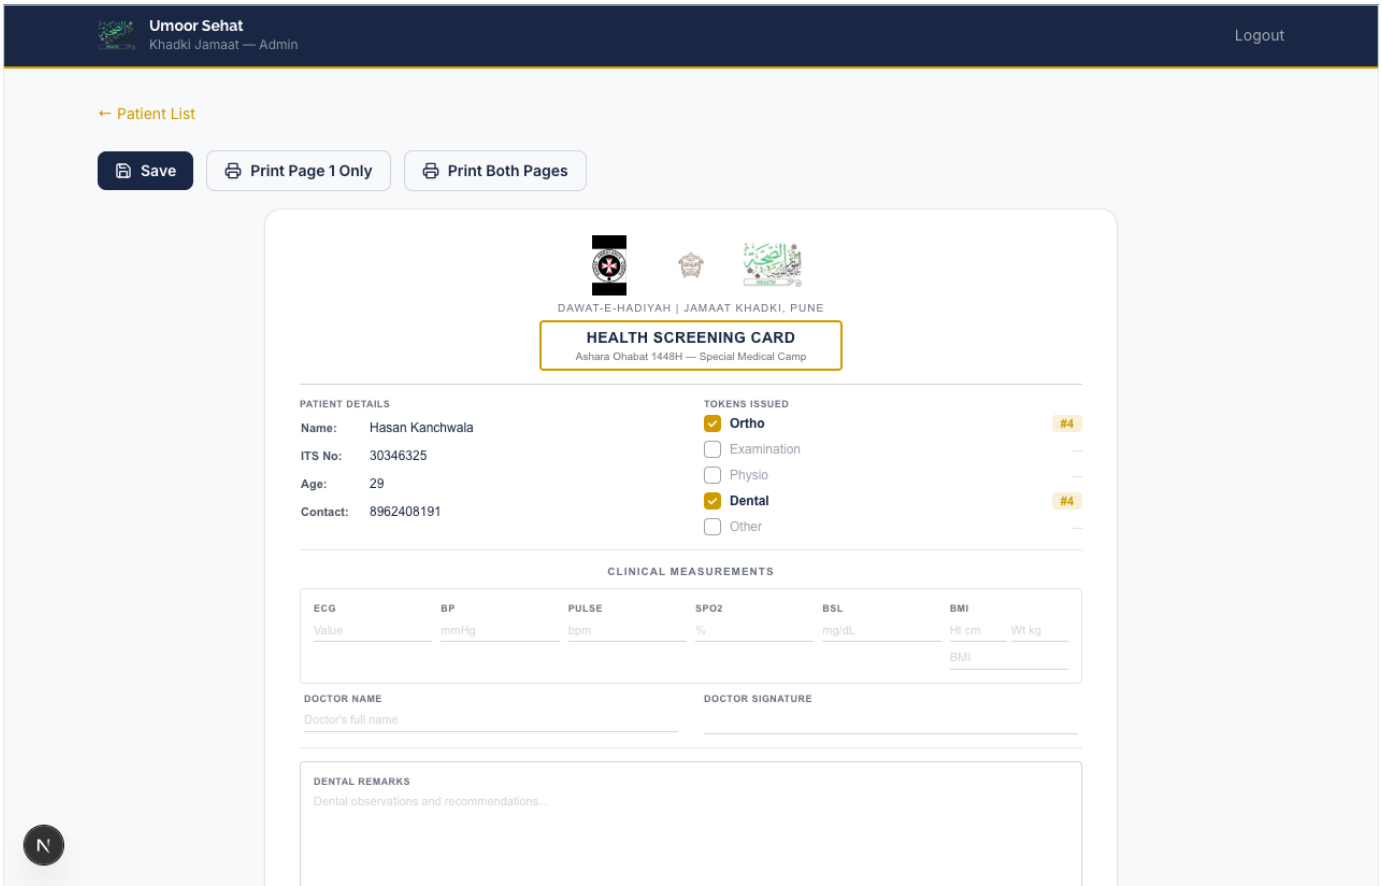
Step 6 — Health Screening Card (Page 1)

After saving, the patient's Health Screening Card opens automatically. This is the A4 medical record with the official letterhead (3 logos).

The card shows:

- Patient details (Name, ITS, Age, Contact) top-left
- Assigned tokens with numbers top-right
- Clinical Measurements row: ECG, BP, Pulse, SpO2, BSL, BMI
- One shared Doctor Name + Signature for all vitals
- Dental Remarks block (full width)
- Ortho Remarks block (full width)

Doctors fill in values at the camp. All fields are editable.

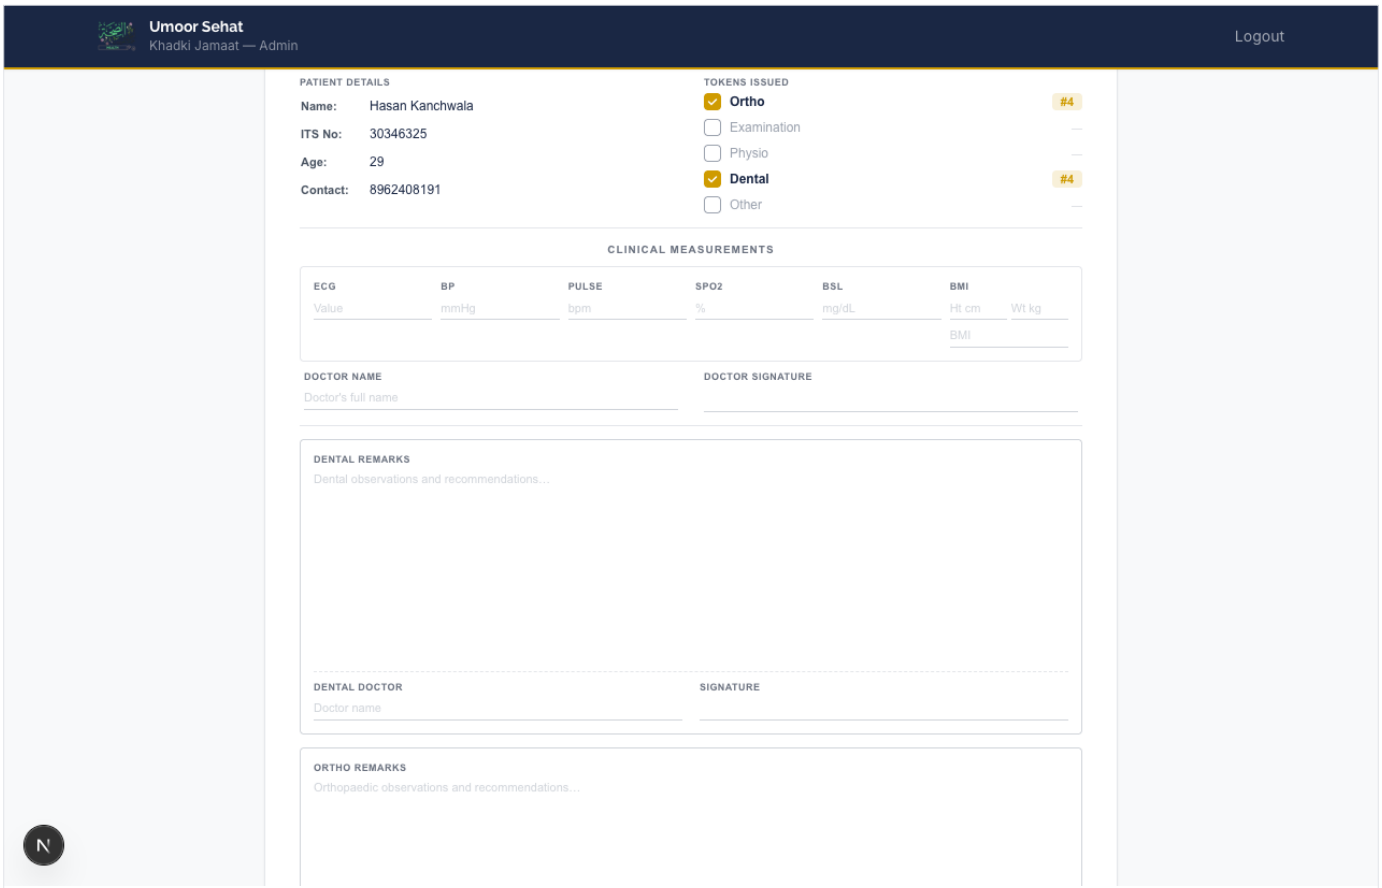


Step 6b — Health Screening Card (Remarks Area)

Below the vitals, the card has two full-width remark boxes:

- Dental Remarks — text area for dental observations + dental doctor name & signature line
- Ortho Remarks — text area for ortho observations + ortho doctor name & signature line

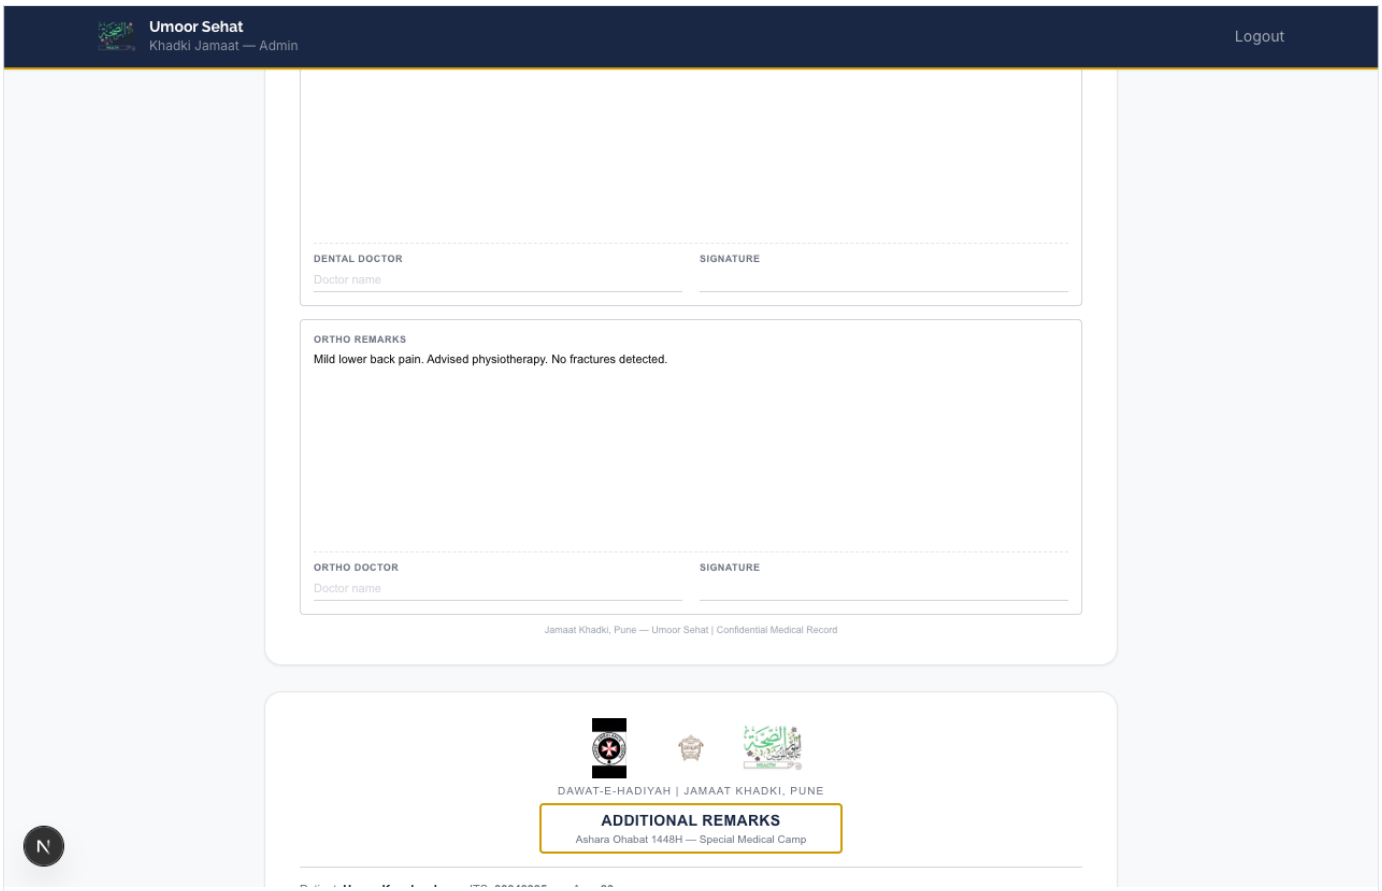
Click Save to store all entered values in the database.



Step 6c — Health Screening Card (Filled Example)

Example of a filled Health Screening Card with vitals and remarks entered by doctors at the camp.

All values are typed directly into the fields. The card updates live — click Save at any time to store the data in the database.



Step 7 — Print Preview (A4 Layout)

When printing, all UI chrome (header, buttons, navigation) is hidden. Only the A4 letterhead content prints.

The printed card contains:
- 3 official logos + letterhead at top
- Patient details & token assignments
- Clinical measurements table
- Shared doctor signature
- Dental Remarks box
- Ortho Remarks box
- Footer: 'Jamaat Khadki, Pune — Umoor Sehat | Confidential'

To print: click 'Print Page 1 Only' !' in the browser print dialog, set Margins to None and uncheck Headers and Footers.

HEALTH SCREENING CARD

Ashara Ohabat 1448H — Special Medical Camp

PATIENT DETAILS

Name: Hasan Kanchwala

ITS No: 30346325

Age: 29

Contact: 8962408191

TOKENS ISSUED

- [x] Ortho #4
- [ ] Examination —
- [ ] Physio —
- [x] Dental #4
- [ ] Other —

CLINICAL MEASUREMENTS

ECG	BP	PULSE	SPO2	BSL	BMI	
72 bpm	120/80	78	98%	95	170	68
					23.5	

DOCTOR NAME: Dr. Ahmed Khan

DOCTOR SIGNATURE

DENTAL REMARKS

No cavities. Mild plaque buildup on lower molars. Advised scaling.

DENTAL DOCTOR: Doctor name

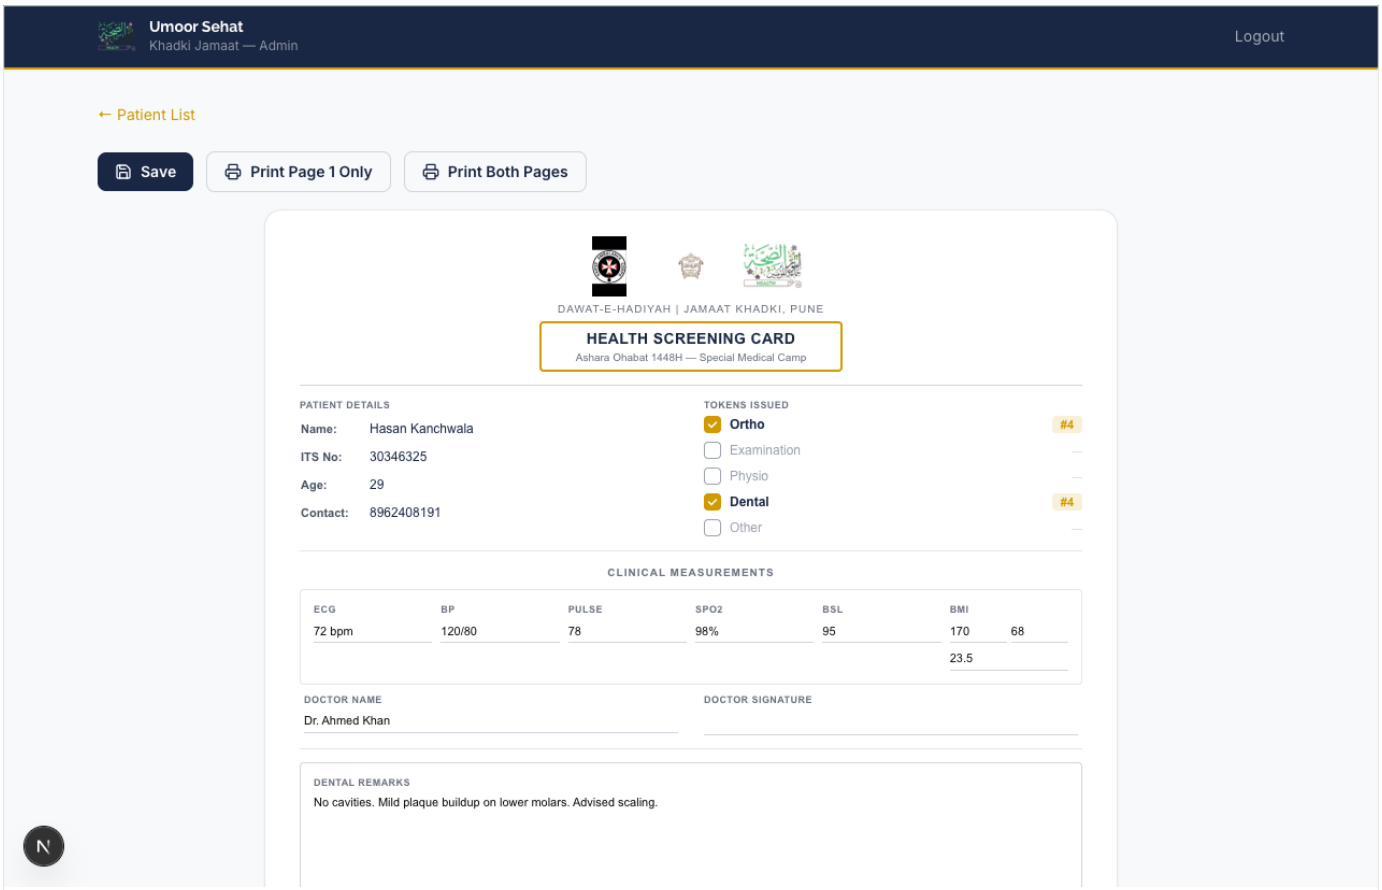
SIGNATURE

Step 8 — Print Options

Three action buttons appear above the card:

[Save] — Saves all values to the database.
[Print Page 1 Only] — Prints the main Health Screening Card only.
[Print Both Pages] — Also prints a second page for Additional Remarks / Follow-up Notes.

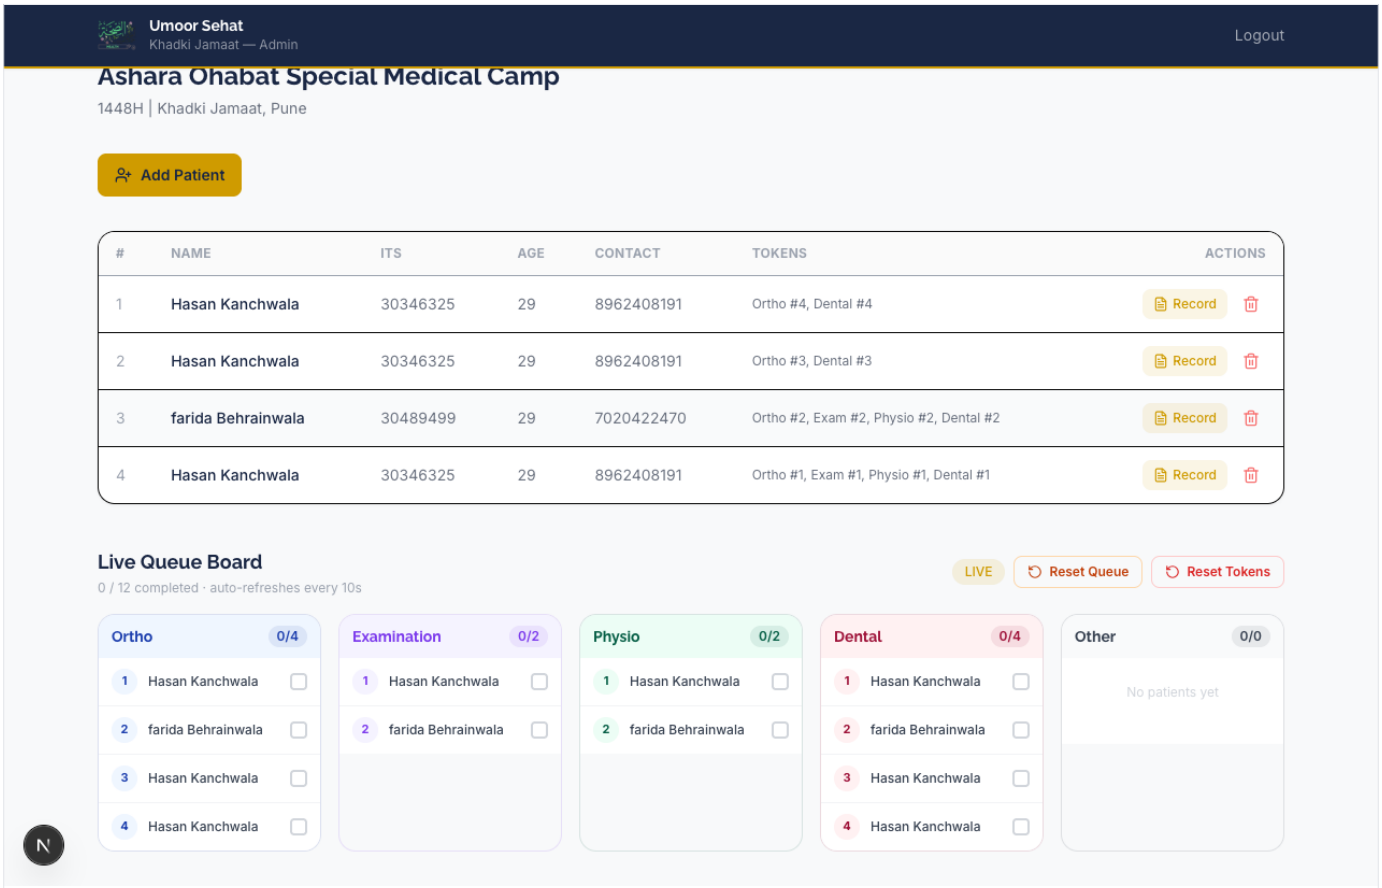
Tip: In the Chrome print dialog, set Margins !' None and uncheck Headers & Footers for a clean A4 print with no browser URL or page numbers.



Step 9 — Live Queue Board

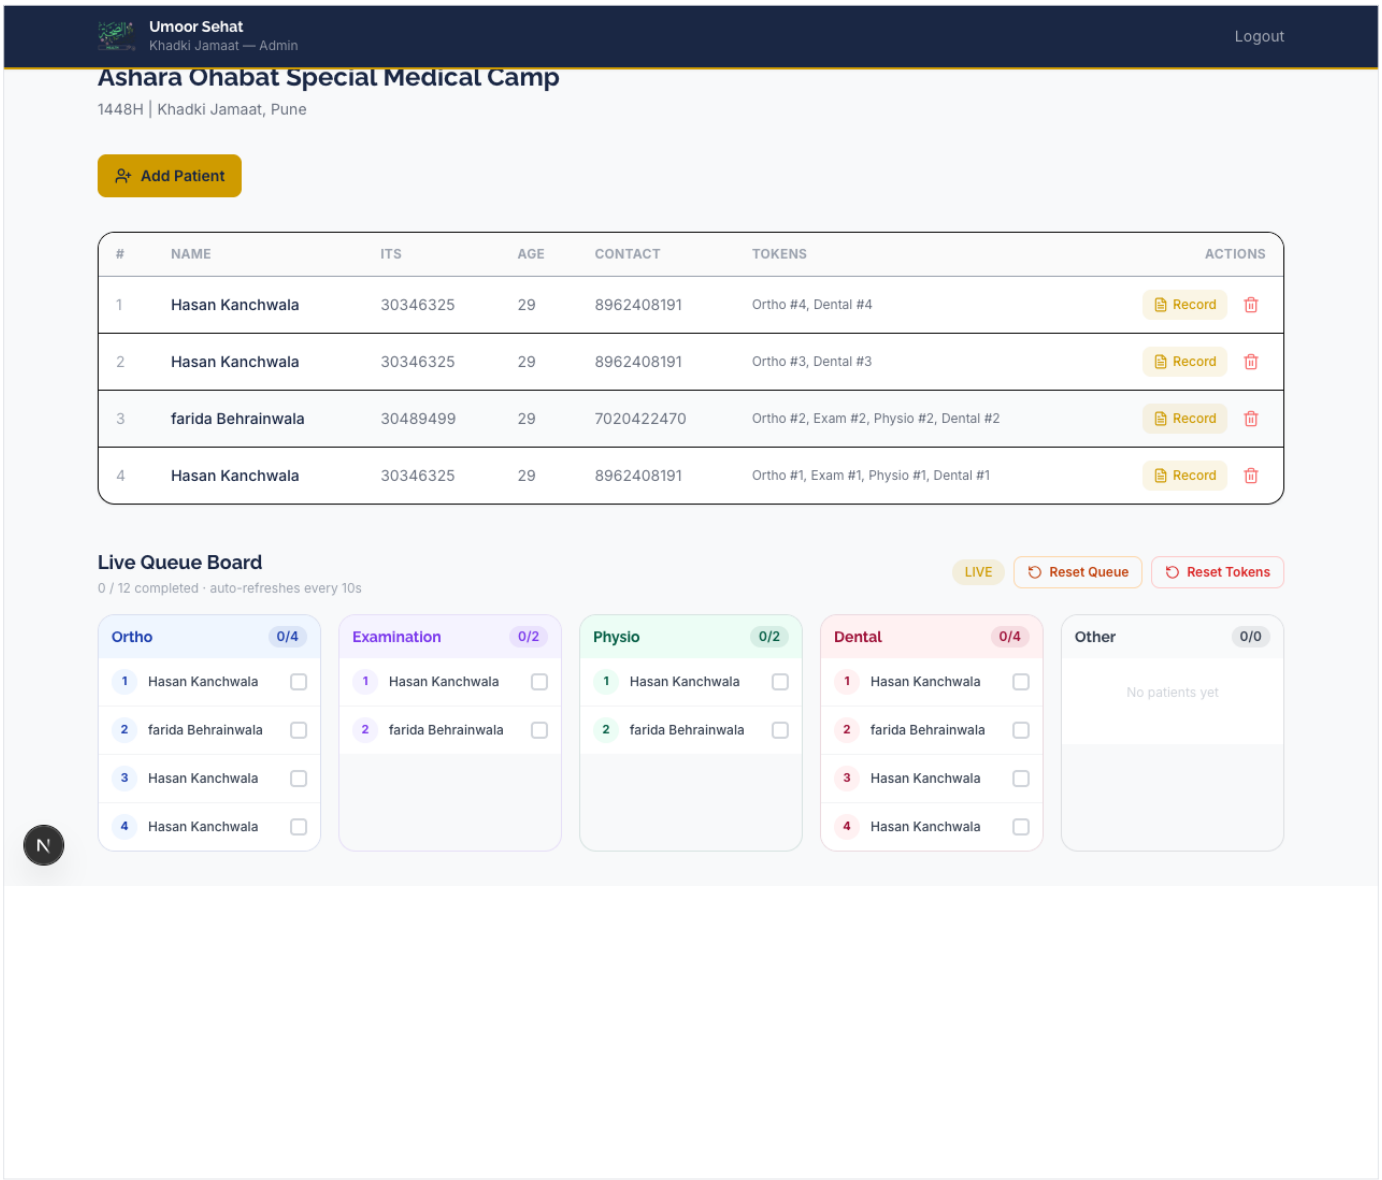
Below the patient list, the Live Queue Board shows 5 columns — one per category.

Each patient appears under their assigned category with their token number. Staff can:
- Click a patient row to mark them as done !' name gets strikethrough + green tick
- Click again to unmark
- The board auto-refreshes every 10 seconds
- Done count shown per column (e.g. '1/3')



Step 10 — Reset Controls

Two reset buttons are available on the queue board header:

[Reset Queue] — Clears all done/strikethrough marks. Use this at the start of a new session or shift.
[Reset Tokens] — Resets all 5 token counters back to 0. Next patient added will get Token #1 again.


Both buttons ask for confirmation before resetting.
